

Better, More Reliable Data Faster.

With assisTek, Your Clinical Research Will Be an Incredible Experience for Patients, Sites, and Sponsors.

At assisTek, eCOA (electronic clinical outcome assessment) is our sole focus. It's all we do, all day, every day. Our experienced team has been in this niche of clinical research for more than 25 years. If you want to work with a group of seasoned, knowledgeable experts with deep domain experience, you want assisTek.

Boutique by design, incomparably knowledgeable, and always customer focused, assisTek is the partner that every clinical trial team hopes for.

*Welcome to concierge-style service
for clinical trial teams.*

assisTek Delivers Speed with Superior Quality, on Time.

Concierge service from industry leaders means your study will be purpose built to your unique design in our configurable and customizable platform and delivered on time, and with the utmost quality. Our TEK Studio employs the TEK Configurator and allows for rapid configurations that are adaptable to your particular study design needs, and supports a full range of patient-centric eCOA requirements. You can rely on assisTek's digital, cloud-based solutions to deliver an exceptional user experience for sponsors, investigator sites, and patients. Rest assured you'll get an exceptional trial experience that includes personalized attention and commitment to your complete satisfaction.

assisTek People Are Among the Industry's Leaders.

Who works with you when you work with assisTek? Some of the industry's most respected and experienced experts. Members of our team author manuscripts and serve in leadership roles in professional organizations. Day in and day out, assisTek people lead.

- assisTek solutions seamlessly integrate with wearables, peripherals, and other applications
- Experienced with more than 100 languages and in 80 countries
- Experienced in 46 therapeutic areas, specializing in rare and ultra-rare diseases

TEK eCOA Solutions Designed to Support Success and Peace of Mind.

At assisTek, we have more than 25 years of experience in keeping ahead of the curve. With that know-how behind us, we've built a digital platform that is highly secure, cloud-based, and designed to be patient focused while accelerating outcomes and delivering on study goals and objectives in a timely and top-quality manner. The straightforward intuitive interface is user-friendly, configurable, and highly capable.

Our products offer solutions for field-based and site-based electronic data capture of clinical outcome assessments including Patient Reported Outcomes (PROs), Clinician Reported Outcomes (ClinROs), Observer Reported Outcomes (ObsROs) and Performance Outcomes (PerfOs)

Build Your Clinical Trial with TEK Configurator.

Design purpose-built, digital solutions in our highly secure cloud-based platform. Quickly configure and customize to tailor design to meet study requirements. Prevalidated components of our platform environment lead to efficiencies and optimize productivity of stakeholders. Scalable. Includes a library of assessments.

Capture Field Data from Patients at Home Anywhere with TEK eDiary.

For patients of any age or level of experience with technology, the TEK eDiary is an intuitive, easy-to-use electronic tablet program. Customize it to meet your specific protocol objectives and requirements. Study teams can manage more effectively through electronic messaging (SMS text and email) with real-time access to patient events, potential compliance concerns, and safety issues.

Streamline Consent and Improve Compliance with TEK eConsent.

TEK eConsent will dramatically improve the consent process by simplifying study start-up and improving patient comprehension and retention. Minimize the workload for the patient and the site personnel and forego the use of a separate system by having patients consent via assisTek's eConsent.

Real-time Access to Study Data with TEK Portal.

The TEK Portal provides real-time data based on synced information from the modules. For security and ease of access, it's password protected and provides reports through a web portal or device. Produces standard reports in real-time, including:

- User Management
- Subject Management
- Data Monitoring
- Device Management
- Data Visualization and Analytics

BYOD Designed to Put the Patient First.

Easy-to-use application accessible to patients via their smart devices. Significantly reduces startup times for studies. Large library of prebuilt assessments means rapid deployment. Highly secure and privacy compliant.

Effortlessly Capture Data Onsite at Clinics Globally with the TEK eCOA Tablet.

Designed to support any clinical trial questionnaire, including Patient Reported Outcomes (PROs), Clinician Reported Outcomes (ClinROs), Observer Reported Outcomes (ObsROs) and Performance Outcomes (PerfOs), the TEK eCOA Tablet can be used with any of our modules or as a stand-alone. Includes support for multiple languages and data transmission at international and remote sites. Ease of use for site personnel leads to improved quality and increases efficiency and productivity. Helps to ensure quality data.

Still using paper?

We've helped many clients move to eCOA. Let's talk about how we can help you.

New to running a clinical trial?

As our name suggests, we're here to assist. We can provide all the guidance you need to succeed.
